

## **SYLink Technologie Speeds Expansion by Exhibiting at CES 2017**

Las Vegas Convention Center  
South Hall 1  
Booth #21743

**Clermont-Ferrand, December 09, 2016 – SYLink Technologie, the French creator of the first smart information-security console for homes and microcompanies, is one of 3,500 companies to be selected by the Consumer Technology Association to exhibit at the fiftieth Consumer Electronics Show (CES) in Las Vegas on January 5-8, 2017. There, the startup will officially unveil its device and seek out financial backers to launch production of its console. SYLink is sponsored by FrenchTech Clermont Auvergne.**

### **The first internet-security console for homes and microcompanies**

Every day brings new stories of cyberattacks against smart devices, smartphones and laptops. In 2015, the number of attacks rose by 51% in France,<sup>1</sup> and 2016 will set yet a new record for hacks. IT security has become a threat to public order and affects private individuals, microcompanies, and major corporations alike.

SYLink's console is a streamlined control center featuring a 7" touchscreen and a highly intuitive interface. It allows users to monitor the digital environment of their home, store or small business at a glance. The control screen displays essential information (connection speed, security index, number of smart devices, connections to nefarious websites, anti-virus status, etc.) in a graphical, color-coded format. An SYLink mobile app lets users control the panel remotely.

SYLink also puts users in touch with a digital security expert, who can take control of their devices and repair a security breach.

### **First time at CES**

SYLink was selected by FrenchTech Clermont-Ferrand Auvergne to attend CES 2017 in Las Vegas. The honor is a major step in the development of the startup, which was founded in 2015 by security experts. SYLink will meet with international technical and financial partners at CES to accelerate the production phase of its console.

"CES is a springboard for us. For three days, the eyes of the IT world will be locked on Las Vegas, giving us an opportunity to unveil our console and gauge customer enthusiasm," says David Legeay, founder of SYLink Technologie.

### **About SYLink Technologie [www.sylink.fr](http://www.sylink.fr)**

SYLink Technologie is a startup 2.0 and creator of a smart firewall console. Its innovative solution uses some of the world's most powerful algorithms to scrutinize and analyze connections and detect and alert users to danger. The SYLink has a unique design and simple interface that make the console fun and easy to set up and use. The startup hopes to have 500,000 customers worldwide by 2020, for a total of \$300 million in revenue.
